1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 2, 2005 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 4,8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by **Chang et al.** ("Chang") (U.S. Patent 6,704,728 B1).

Regarding claim 4, **Chang** teaches a method, performed by a search engine, comprising:

assigning related tokens to one of the tokens to further define the one of the tokens (col.9, lines 52-54; col.5, lines 39-42).

Regarding claim 8, **Chang** teaches a method, performed by a search engine, comprising:

wherein the identifying at least one token further comprises detecting a predetermined character that identifies at least one keyword as the at least one token at col. 9, lines 16-24.

Regarding claim 9, **Chang** further teaches providing feedback related to the accuracy of the at least one token (col. 3, line 45 — col. 4, line 5).

Regarding claim 10, **Chang** teaches a method, performed by a search engine, comprising:

- a). performing a background routine, during a first amount of time, including:
  - 1). determining tokens (col. 2, lines 56-67);
  - 2). assigning related expressions to each of the tokens to define each of the tokens (col. 9, lines 52-54; col. 5, lines 39-42);
  - 3). searching documents (col. 9, lines 57-60)
  - 4). identifying occurrences of any of the related expressions for any of the tokens in any of the documents (col. 5, lines 24-26; col. 10, lines 65-67; col. 9, lines 52-54); and
  - 5). indexing each of the documents, having at least one of the related expressions for at least one of the tokens, corresponding to the at least one of the

tokens (col. 2, lines 24-30; col. 10, lines 19-39); and

b). performing a foreground routine, during a second amount of time substantially less than the first amount of time, including:

- 1). receiving a search query (col. 2, lines 56-59);
- 2). identifying at least one token in the search query (col. 9, lines 16-24);
- 3). finding the at least one token in an index to identify documents, having an occurrence of at least one of the related expressions for the at least one the token, corresponding to the at least one the token (col. 10, lines 19-39); and
